

CAL 77

CAL 77 is a liquid steam cleaning material designed with economy and convenience in mind. CAL 77 is the only material that can do the job of four ordinary cleaners. It does light, medium, heavy-duty and extra heavy-duty jobs, just by varying the amounts used.

CAL 77 is completely soluble, greatly reducing breakdowns and steam cleaner maintenance costs, and eliminated wasted material due to damp powders. CAL 77 will remove road scum, oil, grease and even burned on grease, leaving the surface with no residue.
